Subject: NRC staff understanding of information Entergy Operations Inc will provide as follow-up to PEC July 16, 2013

Chris,
Attached please find the NRC staff understanding of information that Entergy Operations, Inc (EOI) will provide as follow-up actions to the predecisional enforcement conference held on July 16, 2013.

The staff also understands that EOI would like to present this information in a public teleconference meeting, toward which we are working as to date, time, attendees, logistics, and so on. However, the staff notes that in order to complete the SER on the GGNS LRA, complete and accurate responses to the RAIs indicated in Letter IR 05000416/2013201 dated June 11, 2013 (and in the attached), will be needed in writing and on the docket. Those RAI responses can be delivered to the staff at a later date than EOI's presentation for the follow-up PEC.

This email and attached list will be placed in the NRC's ADAMS system for public record.

If you have any questions, please contact me.

Thanks.
