### SUMMARY

This refers to your renewal application dated January 11, 2013 and the phone conversation between Chris Rasmussen and Jennifer Bishop on June 3, 2013.

While reviewing your application to renew your license, we noticed several discrepancies from your current license, including:

- A. In your current license, one of your locations of use is does not match what is currently listed on your license. Also, you are currently authorized by your license to use the gauges at temporary job sites anywhere that NRC maintains jurisdiction, however this was not requested in your application. In the NRC guidance document, NUREG 1556, Vol. 1, Rev. 1, Section 8.3, Item 3 indicates that most applicants need to provide two types of information: (1) description of storage, use, and dispatch locations (2) specification of whether they intend to use the portable gauge at temporary job sites.

**RESPONSE: Please confirm the correct locations of use for the devices you possess and confirm if you plan to use the gauges at temporary job sites.**

- B. In your current license, you are authorized to possess Humboldt Scientific, Inc. Model No. 5001 gauging device, however this device was not requested in your renewal application. In addition, your application did not indicate the per source or total possession limit for each radionuclide you requested.

**RESPONSE: Please provide a written statement to confirm if this device should remain on your license. If this device is no longer in your possession, please submit the documentation showing it has been properly transferred to an**

**authorized recipient. Also, please include in your written response the per source and total possession limit you will require and note that it is acceptable to request more sealed sources than you may actually need immediately, to allow for some growth, so long as the request is reasonable and realistic.**

- C. In your renewal application, you have indicated that John Edlebeck will be the RSO. This is different than the RSO on your current license. Please note that you will not be able to change and name your RSO internally; NRC must do that for you via the amendment process.

**RESPONSE: Please provide the name and qualifications of your proposed RSO and a written, signed (by both senior management and the proposed RSO) and a currently dated statement that stipulates your proposed RSO accepts the RSO position and understands the duties and responsibilities associated with the position. Each proposed RSO must be qualified in accordance with the guidance in NUREG 1556, Vol 1, Rev. 1, Section 8.7, Item 7: Individual(s) Responsible for Radiation Safety Program and Their Training and Experience. Please see Attachment 1 for a sample delegation of authority.**

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

**Action Required:**

Submit the requested information within 14 calendar days (by June 17, 2013) by referencing control number 579830 to facilitate proper handling in our office. Please contact me if you need to make alternative response arrangements.

**PLEASE DIRECT ANY QUESTIONS YOU MAY HAVE TO ME AT (630) 829-9607.**
