Request for Review and Approval of ANP-10323P, "Fuel Rod Thermal Mechanical Methodology for Boiling Water Reactors and Pressurized Water Reactors"

AREVA NP Inc. (AREVA NP) requests the NRC's review and approval of the topical report ANP-10323P, "Fuel Rod Thermal Mechanical Methodology for Boiling Water Reactors and Pressurized Water Reactors."

This report presents a methodology for the realistic evaluation of the thermal-mechanical performance of UO₂ and Mixed Oxide (MOX) fuel rods for Boiling Water Reactors (BWRs) and Pressurized Water Reactors (PWRs) which complies with the requirements of Section 4.2 of NUREG-0800. The methodology consists of the best-estimate fuel performance code GALILEO that models the thermal-mechanical behavior of the fuel rods, and application methodology for determining the behavior of rods in a BWR and a PWR core during normal operation and anticipated operational occurrences. The objective of the methodology is to quantify the fuel design margins to the generic design criteria.

This topical report supports the U.S. Department of Energy plutonium disposition program which is intended to dispose of weapons grade plutonium by converting it into MOX fuel for use in a nuclear reactor. NRC approval of this topical report is being requested to support use of UO₂ and MOX fuel in BWRs and PWRs.

The topical report ANP-10323P is part of AREVA NP's response to NRC Information Notice 2009-23: Nuclear Fuel Thermal Conductivity Degradation. This information notice states that previous fuel performance codes did not model the impact of irradiation on fuel thermal conductivity adequately. The GALILEO fuel performance code in ANP-10323P contains a nuclear fuel thermal conductivity model which accurately reflects the impact of irradiation.

AREVA NP considers some of the material contained in the enclosed document to be proprietary. As required by 10 CFR 2.390(b), an affidavit is enclosed to support the withholding of the information from public disclosure. Proprietary and non-proprietary versions of the report are enclosed.

In support of the Office of Nuclear Reactor Regulation's prioritization efforts, the prioritization scheme matrix is attached.

AREVA NP would appreciate the NRC approval of this topical report by September 30, 2015.

Comments: The emergent technical issue is fuel thermal conductivity degradation.			

A F F I D A V I T

COMMONWEALTH OF VIRGINIA)
) ss.
CITY OF LYNCHBURG)

1. My name is Gayle F. Elliott. I am Manager, Product Licensing, for AREVA NP Inc. (AREVA NP) and as such I am authorized to execute this Affidavit.

2. I am familiar with the criteria applied by AREVA NP to determine whether certain AREVA NP information is proprietary. I am familiar with the policies established by AREVA NP to ensure the proper application of these criteria.

3. I am familiar with the AREVA NP information contained in the topical report ANP-10323P titled "Fuel Rod Thermal Mechanical Methodology for Boiling Water Reactors and Pressurized Water Reactors," dated July 2013, and referred to herein as "Document." Information contained in this Document has been classified by AREVA NP as proprietary in accordance with the policies established by AREVA NP for the control and protection of proprietary and confidential information.

4. This Document contains information of a proprietary and confidential nature and is of the type customarily held in confidence by AREVA NP and not made available to the public. Based on my experience, I am aware that other companies regard information of the kind contained in this Document as proprietary and confidential.

5. This Document has been made available to the U.S. Nuclear Regulatory Commission in confidence with the request that the information contained in this Document be withheld from public disclosure. The request for withholding of proprietary information is made in accordance with 10 CFR 2.390. The information for which withholding from disclosure is

requested qualifies under 10 CFR 2.390(a)(4) "Trade secrets and commercial or financial information":

6. The following criteria are customarily applied by AREVA NP to determine whether information should be classified as proprietary:

- (a) The information reveals details of AREVA NP's research and development plans and programs or their results.
- (b) Use of the information by a competitor would permit the competitor to significantly reduce its expenditures, in time or resources, to design, produce, or market a similar product or service.
- (c) The information includes test data or analytical techniques concerning a process, methodology, or component, the application of which results in a competitive advantage for AREVA NP.
- (d) The information reveals certain distinguishing aspects of a process, methodology, or component, the exclusive use of which provides a competitive advantage for AREVA NP in product optimization or marketability.
- (e) The information is vital to a competitive advantage held by AREVA NP, would be helpful to competitors to AREVA NP, and would likely cause substantial harm to the competitive position of AREVA NP.

The information in the Document is considered proprietary for the reasons set forth in paragraphs 6(c) and 6(d) above.

7. In accordance with AREVA NP's policies governing the protection and control of information, proprietary information contained in this Document has been made available, on a limited basis, to others outside AREVA NP only as required and under suitable agreement providing for nondisclosure and limited use of the information.

8. AREVA NP policy requires that proprietary information be kept in a secured file or area and distributed on a need-to-know basis.

9. The foregoing statements are true and correct to the best of my knowledge, information, and belief.

SUBSCRIBED before me this 18th
day of August 2013.

Sherry L. McFaden
