Control No.: 579153

U.S. Nuclear Regulatory Commission, Region I  
2100 Renaissance Blvd, Suite 100  
King of Prussia, PA 19406-2713

**SUBJECT: Yale-New Haven Hospital Response to NRC Additional Information  
Request, dated June 27, 2013**

Gentlemen and women of the NRC,

In response to your request for additional information, Yale-New Haven Hospital (YNHH), effective May 1, 2013, purchased the assets of Cardiology Associates of New Haven, P.C. (CANH). As of this date, the practice locations formerly operated by CANH have been operated by YNHH as provider-based outpatient hospital cardiology department sites. These hospital outpatient sites are fully integrated within the YNHH organization and infrastructure, including but not limited to the non-physician staff at these sites, who became YNHH employees effective as of the asset purchase date. The physicians formerly employed by CANH continue to care for patients at these sites, however as of May 1, 2013 the physicians are employees of Yale University and not of CANH. Their status as Authorized Users was transferred to the YNHH NRC broadscope license during the last meeting of the YNHH Radiation Safety Committee on July 17, 2013. They are currently continuing to operate under the existing CANH NRC license conditions and commitments, until this amendment request is finalized.

The only change in personnel or duties that relate to the licensed program are the duties of the Radiation Safety Officer. Currently, Dr. Prescott Wiske is the Radiation Safety Officer (RSO) under the existing CANH NRC license. Radiation safety responsibilities will be assumed by the YNHH Radiation Safety Program (RSP) upon completion of this amendment to the YNHH NRC license. The RSP at YNHH consists of an experienced staff, including a Radiation Safety Officer with 34 years medical health physics experience, three Asst. RSO's and an administrative assistant.

20 York Street  
New Haven, CT 06504

The existing facilities and equipment named on the current CANH NRC license will stay at their current locations, located at 2 Devine Street, Suite 1, North Haven, CT and 1591 Boston Post Road, Guilford, CT. Equipment and procedures may be altered as needed to be in regulatory compliance, along with YNHH NRC license conditions and commitments.

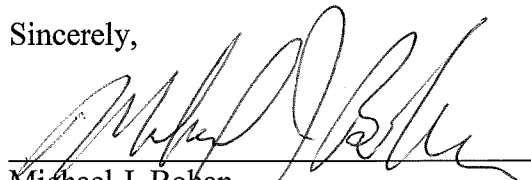

All radiation safety surveillance programs (surveys, wipe tests, quality control) will be supervised by the YNHH RSP, in compliance with all regulations, license conditions and commitments. Occupational dosimetry and associated records will be assumed and maintained by the YNHH RSP.

All records concerning the safe and effective decommissioning of the CANH facilities will be assumed and maintained by the YNHH RSP.

The former CANH facilities will abide by all NRC regulations and YNHH NRC license conditions and commitments upon completion of the amendment process.

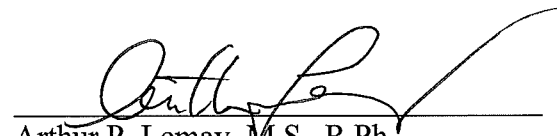

If you have any further questions, please feel free to contact the Radiation Safety Officer at the address or phone number above.

Sincerely,

---

Michael J. Bohan  
YNHH Radiation Safety Officer
