LISLE, ILLINOIS 60532-4352

JUL 22 2013

Brian J. Vetter
Radiation Safety Officer
University of Minnesota
W-166 Boynton Health Service
410 Church St. SE
Minneapolis, MN 55455

Dear Mr. Vetter:

Enclosed is Amendment No. 60 renewing your NRC Material License No. 22-00187-46 in accordance with your request. Note that **we have revised Conditions 8, 10, 12, 15, and 22, and added Conditions 16, 17, and 18, in accordance with your application and current licensing policy. We have also removed Condition 20, as listed on the previous revision to your NRC Material License, as it no longer applies to your licensed program.**

Finally, we have added Condition 23 for Safe Use of Radionuclides. If the Safe Use procedures outlined in NUREG 1556, Volume 11, "Program-Specific Guidance about Licenses of Broad Scope," do not meet your needs, please provide alternative procedures.

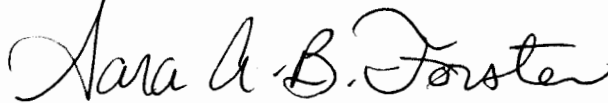

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

A handwritten signature in cursive script that reads "Sara A.B. Forster". The signature is written in black ink and is positioned above the printed name and title.
