---

David,

Thanks you for your telephone call on Friday. As I understand it, San Juan Batista recently received an invoice for an annual fee and you believe a request for termination was submitted to NRC one year ago. On Friday evening you faxed to me: (1) a NRC Form 314 signed by Yocasta Brugal, MD on 8/24/2012 indicating no radioactive materials had ever been possessed by the licensee under the San Juan Batista School of Medicine license; and (2) a statement signed by the Administrator, Rogelio Diaz Garcia, indicating no radioactive sources, records indicating possession or use of radioactive materials, or equipment needed to use radioactive materials was found in the facility.

I am traveling on Monday and Tara is on vacation but I will ask Robin Elliott and Penny Lanzisera to follow up on this. Is it possible the NRC Form 314 and the statement were never before submitted to Region I? We have no record of receiving these documents previously.

jim
