Docket No. 50-274

US Nuclear Regulatory Commission
ATTN: James Dyer
Chief Financial Officer
Mailstop 9 F4
Office of the Chief Financial Officer
Washington DC 20555

Sir:

This letter is in response to the NRC fee regulations contained in 10 CFR Parts 170 and 171. The U.S. Geological Survey was first granted an exemption from the FY 1992 annual license fees for its non-power reactor in Denver, CO, and that exemption has continued through FY 2012. This letter is to certify that the U.S. Geological Survey's research reactor in Denver continues to meet the exemption criteria specified in 10 CFR 171.11(a)(2). The operation and design of the reactor have not changed since our original exemption request contained in letters dated 10/19/92 and 2/11/93.

Please continue the USGS exemption for License R-113 through FY2013. If this information needs further clarification, please contact me.

Sincerely,

A handwritten signature in dark ink that reads "Tim DeBey". The signature is written in a cursive, slightly slanted style.

Tim DeBey
USGS Reactor Supervisor
