NRC FORM 374			PAGE <u>1</u> OF <u>3</u> PAGES					
MATERIALS LICENSE Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.								
Licensee								
1. Cheat Road Engineering, Inc.		3. License number 47-35070-01						
	LEAR A	REG						
2. 170 Old Cheat Road		4. Expiration date August 31, 2023						
Morgantown, West Virginia 26508		5. Docket No. 030-38648						
4		Reference No						
 Byproduct, source, and/or special nuclear material A. Cesium 137 A. 	Chemical and/or Sealed Source	n Reg	 8. Maximum amount that licensee may possess at any one time under this license A. 45 millicuries total and no 					
		556; IPL Model	single source to exceed the maximum activity specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission or an Agreement State					
B. Americium 241	 B. Sealed Sources (QSA, Inc Model No. AMN.V997; IPL Model Nos. Am1.NO2, 3021 or 3027) B. 220 millicuries total and no single source to exceed the maximum activity specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission or an Agreement State 							
 9. Authorized use: A. and B. In Troxler Electronic Laboratories Model No. 3400 Series portable gauging devices for measuring physical properties of materials. 								
CONDITIONS								
10. Licensed material may be used or stored at the licensees facilities located at 170 Old Cheat Road, Morgantown, West Virginia, and may be used at temporary job sites of the licensee anywhere in the United States where the U.S. Nuclear Regulatory Commission maintains jurisdiction for regulating the use of licensed material, including areas of exclusive Federal jurisdiction within Agreement States.								
If the jurisdiction status of a Federal facility within an Agreement State is unknown, the licensee should

		MATERIALS LICENSE SUPPLEMENTARY SHEET	Docket or Reference Number 030-38648			
	cont	act the Federal agency controlling the job site in que	estion to determine whether the proposed job			
	site is an area of exclusive Federal jurisdiction. Authorization for use of radioactive materials at job sites in Agreement States not under exclusive Federal jurisdiction shall be obtained from the appropriate stat regulatory agency.					
11.	Licensed material shall be used by, or under the supervision of, individuals who have received the training described in the letter dated July 16, 2013, and have been designated, in writing, by the Radiation Safety Officer. The licensee shall maintain records of individuals designated as users for 3 years following the last use of licensed material by the individual.					
12.	The	Radiation Safety Officer for this license is Scott Cor	pen.			
13.	A.	A. Sealed sources shall be tested for leakage and/or contamination at intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State.				
	В.	In the absence of a certificate from a transferor indicating that a leak test has been made within the intervals specified in the certificate of registration issued by the U.S. Nuclear Regulatory Commission under 10 CFR 32.210 or under equivalent regulations of an Agreement State, prior to the transfer, a sealed source received from another person shall not be put into use until tested and the test results received.				
	C.	Sealed sources need not be tested if they are in storage and are not being used; however, when they are removed from storage for use or transferred to another person and have not been tested within the required leak test interval, they shall be tested before use or transfer. No sealed source shall be stored for a period of more than 10 years without being tested for leakage and/or contamination.				
	D.	The leak test shall be capable of detecting the pre- radioactive material on the test sample. If the test becquerels) or more of removable contamination, Regulatory Commission in accordance with 10 CF immediately from service and decontaminated, re- Commission regulations.	sence of 0.005 microcurie (185 becquerels) of reveals the presence of 0.005 microcurie (185 a report shall be filed with the U.S. Nuclear TR 30.50(c)(2), and the source shall be removed			
	E.	E. Tests for leakage and/or contamination, limited to leak test sample collection, shall be performed by the licensee or by other persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services. The licensee is not authorized to perform the analysis; analysis of leak test samples must be performed by persons specifically licensed by U.S. Nuclear Regulatory Commission or an Agreement State to perform such service				
	F. Records of leak test results shall be kept in units of microcuries and shall be maintained for 5					

years.

14.	U.S. Nuclear Regulatory Commission, to a under the license. Records of inventories	account fo shall be r	ry six months, or at other intervals approved by the r all sources and/or devices received and possessed naintained for 5 years from the date of each ities, manufacturer's name and model numbers, and			
15.	Sealed sources or source rods containing licensed material shall not be opened or sources removed or detached from source rods or gauges by the licensee, except as specifically authorized.					
16.	Each portable nuclear gauge shall have a lock or outer locked container designed to prevent unauthorized or accidental removal of the sealed source from its shielded position. The gauge or its container must be locked when in transport or storage, or when not under the direct surveillance of an authorized user.					
17.	Any cleaning, maintenance, or repair of the gauges that requires detaching the source or source rod from the gauge shall be performed only by the manufacturer or by other persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services.					
18.	The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."					
19.	Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
