**SHEARON HARRIS NUCLEAR POWER PLANT, UNITS 2 AND 3
DOCKET NOS. 52-022 AND 52-023
REQUEST FOR EXEMPTION FROM 10 CFR 50.71(e)(3)(iii)**

- References:
1. Letter from James Scarola (PEC) to U.S. Nuclear Regulatory Commission, dated February 18, 2008, "Application for Combined License for Shearon Harris Nuclear Power Plant Units 2 and 3," Serial: NPD-NRC-2008-001
 2. Letter from Christopher M. Fallon (DEP) to U.S. Nuclear Regulatory Commission, dated May 2, 2013, "Combined License Application (COLA) Review," Serial: NPD-NRC-2013-019

Ladies and Gentlemen:

By letter dated February 18, 2008 (Reference 1), Duke Energy Progress, Inc. (DEP) submitted an application for a combined construction permit and operating license for two AP 1000 advanced pressurized water reactors to be located at the existing Shearon Harris Nuclear Plant site. By letter dated May 2, 2013 (Reference 2), DEP requested that the Nuclear Regulatory Commission (NRC) suspend review of the Shearon Harris Nuclear Plant Units 2 and 3 (HAR) combined license application (COLA). The NRC granted that request.

The purpose of this letter is to request an exemption from the requirement set forth in 10 CFR 50.71(e)(3)(iii), as applicable to HAR. Specifically, given that the NRC's review of the HAR COLA has been suspended, DEP requests an exemption from the requirement in 10 CFR 50.71(e)(3)(iii) that an applicant for a combined license under Subpart C of 10 CFR 52 submit annual updates to the Final Safety Analysis Report (FSAR). If the exemption is granted, DEP commits to submitting the next update to the HAR FSAR within six months following reactivation of the HAR COLA review, and to resume submitting annual updates thereafter. Enclosure 1 provides the basis for this exemption request.

If you have any further questions, or need additional information, please contact Bob Kitchen at (704) 382-4046, or me at (704) 382-9248.

I declare under penalty of perjury that the foregoing is true and correct.

Executed on August 7, 2013.

Sincerely,

Christopher M. Fallon
Vice President
Nuclear Development

Enclosure:

1. Basis for Exemption 10 CFR 50.71(e)(3)(iii) for Shearon Harris Nuclear Power Plant Units 2 & 3

cc : U.S. NRC Region II, Regional Administrator
U.S. NRC Resident Inspector, SHNPP Unit 1
Mr. Brian Hughes, U.S. NRC Project Manager

Enclosure 1

Basis for Exemption
from 10 CFR 50.71(e)(3)(iii)
for
Shearon Harris Nuclear Power Plant
Units 2 & 3

I. Proposed Exemption

10 CFR 50.71(e)(3)(iii) requires that applicants for a combined license (COL) under Title 10 of the Code of Federal Regulations (10 CFR) Part 52 shall, during the period from docketing of the COL application until the U.S. Nuclear Regulatory Commission (NRC or Commission) makes a finding under 10 CFR 52.103(g) pertaining to facility operation, submit annual updates to the application's final safety analysis report (FSAR).

Duke Energy Progress, Inc. (DEP) is requesting an exemption from 10 CFR 50.71(e)(3)(iii) for the Shearon Harris Nuclear Power Plant Units 2 and 3 (HAR) FSAR, Part 2 of the HAR combined license application (COLA), given that the NRC's review of the HAR COLA is currently suspended. DEP commits to submitting the next HAR FSAR update within six months following reactivation of the HAR COLA review, and to resume submitting annual updates thereafter.

In summary, the requested exemption is a schedule change from the requirements of 10 CFR 50.71(e)(3)(iii), which is requested in an effort to achieve efficiency and limit the unnecessary expenditure of resources, given that the NRC's review of the HAR COLA is currently suspended. The exemption would allow DEP to submit the next FSAR update for HAR at a later time, in an orderly and efficient manner without undue expenditure of resources, in concert with the NRC staff reinstating its review of the HAR COLA. The FSAR annual update is required by regulation; therefore, deferral of the annual update requires an exemption.

II. Background

By letter dated February 18, 2008 (Reference 1), DEP submitted the HAR COLA, under 10 CFR Part 52, Subpart C, of the NRC's regulations. The NRC staff docketed the application on April 17, 2008 (Reference 2). By letter dated May 2, 2013, DEP requested that the NRC suspend the review of the HAR COLA and related activities (Reference 3). The NRC agreed to the requested suspension. The HAR COLA remains docketed.

III. Exemption Requirements

Pursuant to 10 CFR 50.12(a)(1) and (2), the Commission may, upon application by any interested person or upon its own initiative, grant exemptions from the requirements of 10 CFR Part 50 when:

- (1) The exemptions are authorized by law, will not present an undue risk to public health and safety, and are consistent with the common defense and security; and,
- (2) Special circumstances are present.

Pursuant to 10 CFR 50.12(a)(2), "special circumstances" exist if:

- (ii) Application of the regulation in the particular circumstances would not serve the underlying purpose of the rule or is not necessary to achieve the underlying purpose of the rule; or

(iii) Compliance would result in undue hardship or other costs that are significantly in excess of those contemplated when the regulation was adopted, or that are significantly in excess of those incurred by others similarly situated; or ...

(v) The exemption would provide only temporary relief from the applicable regulation and the licensee or applicant has made good faith efforts to comply with the regulation.

IV. Basis for the Exemption

A. Authorized by Law

The requested exemption is authorized by law. As set forth above, 10 CFR 50.12 allows the NRC to grant exemptions from the requirements of Part 50, such as 10 CFR 50.71(e)(3)(iii), without violating the Atomic Energy Act of 1954, as amended, or the Commission's regulations. This exemption request is for temporary relief from the requirement of 10 CFR 50.71(e)(3)(iii), given that the NRC's review of the HAR COLA has been suspended. The exemption would allow the applicant to submit the next HAR FSAR update within six months following reactivation of the NRC's HAR COLA review, and to resume submitting annual updates thereafter, which would support reactivation of that review.

B. No Undue Risk to Public Health and Safety

Granting the requested exemption will not create undue risk to public health and safety. The underlying purpose of 10 CFR 50.71(e)(3)(iii) is to provide for timely, comprehensive updates of the FSAR associated with a COLA in order to support an effective and efficient review of the COLA by NRC staff and issuance of the staff's safety evaluation report. Because the NRC's review of the HAR COLA is currently suspended, any update to the FSAR that DEP submits during such suspension would not be reviewed by the NRC. The requested exemption is solely administrative in nature in that it pertains to the schedule for submitting revisions to the HAR FSAR for which the NRC's review has been suspended.

Because this exemption request relates only to a timing and administrative issue regarding a suspended COLA, and not to a license that has been or is about to be granted, there are no safety implications associated with granting this exemption request. No new health or safety issues will be created if the filing of the next FSAR update is postponed, in this case, until six months after the COLA review is reactivated. Neither the probability of postulated accidents nor their consequences would be increased in any manner if the request were granted. There would be no undue risk to public health and safety.

C. Consistent with Common Defense and Security

Granting the requested exemption is consistent with the common defense and security. This exemption requesting a change in the timing for submitting the next FSAR update supporting a suspended COLA is unrelated to common defense and security issues. The common defense and security would not be impacted by granting this exemption.

D. *Special Circumstances*

Special circumstances supporting this exemption request are present under 10 CFR 50.12(2) (ii), (iii) and/or (v).

The purpose of 10 CFR 50.71(e)(3)(iii) is to provide for timely, comprehensive updates of the FSAR associated with a COLA in order to support an effective and efficient review of the COLA by NRC staff and issuance of the staff's safety evaluation report. The regulations at 10 CFR 50.71(e)(3)(iii) requiring annual FSAR updates do not address, and do not appear to have contemplated, a situation in which the applicant suspended its pursuit of the COL and the NRC staff has suspended review of the COLA.

Even if DEP were to submit the next updated HAR FSAR when it is currently due, the purpose of 10 CFR 50.71(e)(3)(iii) would go unfulfilled since the NRC has suspended its review of the HAR COLA, including the FSAR. The FSAR is an extensive document, and updating it requires significant effort. DEP believes that submitting an annual FSAR update in support of a COLA for which review has been suspended requires effort and resources in excess of those contemplated by the rule. As such, special circumstances are present under 10 CFR 50.12(a)(2)(iii), because complying with the schedule in the rule would result in undue hardship and unnecessary costs to DEP. Moreover, special circumstances are also present under 10 CFR 50.12(a)(2)(ii), because submitting the next FSAR update within six months of reactivation of the HAR COLA review would be consistent with the underlying purpose of the rule, which is to support an effective and efficient review by NRC staff and issuance of the staff's safety evaluation report.

In addition, special circumstances are present under 10 CFR 50.12(a)(2)(v), because DEP's exemption request seeks only temporary relief from the requirement in 10 CFR 50.71(e)(3)(iii). DEP requests exemption from this requirement because the review of the HAR COLA is suspended. DEP has submitted five revisions to the HAR COLA FSAR since the initial application, the most recent by letter dated April 15, 2013 (Reference 4). As stated above, DEP commits to providing an updated FSAR for HAR within six months following reactivation of the HAR COLA review, and to resume submitting annual updates thereafter. Accordingly, DEP is acting in good faith to comply with the regulation.

V. Conclusion

Based on the considerations discussed above, the requested exemption:

- (1) is authorized by law,
- (2) will not present an undue risk to public health and safety,
- (3) is consistent with the common defense and security, and
- (4) special circumstances are present.

Therefore, DEP requests that the Commission exempt DEP from the requirement of submitting an annual update to the HAR COLA FSAR until six months after the HAR COLA review is reactivated.
