Subject: RE: nozzle 63 presentation for EPRI materials reliability meeting

Thanks Greg, it looks like a good conference. Eventually we will need to know when the proceedings come out so we can mark the document as published.

Thanks Susan, there is no paper, only the presentation. The date of the presentation will be July 19, I'm not available so Darrell will make the presentation. This is not an invited presentation. There should eventually be some proceedings of the slides from EPRI but they will be made available on ADAMS also. Let me know if you have any more questions. Here is a link for the conference program:

Greg,

The presentation looks good to me. We need to fill out a form on our end for both the presentation and paper. Can you please send a copy of the paper if/when it is ready. Also what day are you presenting, was this an invited paper and is it externally (or peer) reviewed?

We made our changes to the NUREG/CR, Kay is formatting it and we should send it out Wednesday at the latest.

Thanks,
Susan

8/18

All,

Attached is the presentation on nozzle 63 for the EPRI materials reliability meeting. Please review and provide me with your comments within a week if possible.

Also, based on our discussion from a couple of weeks ago my understanding is that I'd receive the draft of the NUREG/CR by later this week. Please let me know if there will be some delay.

Thanks,
Greg
