MEMORANDUM TO: Rebecca Giitter, Administrative and Litigation Analyst

FROM: Twana Ellis, Program Analyst

SUBJECT: TENNESSEE VALLEY AUTHORITY (SEQUOYAH NUCLEAR PLANT,  
UNITS 1 AND 2)  
DOCKET NOS. 50-327-LR, 50-328-LR  
ASLBP NO. 13-927-01-LR-BD01  
WRITTEN LIMITED APPEARANCE STATEMENT

Dear Ms. Giitter,

The Atomic Safety and Licensing Board handling the above-captioned adjudication recently received the enclosed communication. While it does not constitute evidence, we deem it to be a limited appearance statement filed pursuant to 10 C.F.R. § 2.315(c).

On behalf of the Sequoyah Board, I request that you place the enclosed documents in the electronic hearing docket for this proceeding.

Thank you.

Dear Chairman Karlin,

I have friends and co-workers in the Chatternooga area. I have been concerned about the relicense of the Sequoyah nuclear plant because it is not safe or efficient.

Citizens have lost faith in this old and tired dinosaur. I request a hearing in the Chatternooga area. These good people deserve an opportunity to express their concerns.

God bless your good work,

Attached is another Limited Appearance Statement to be put into the Sequoyah record.

Could you please send it to Ms. Gitter with the relevant info, as per our discussion yesterday?

Thank you.

Alex

Dear Judge Karlin,

I'm writing in regard to your July 5th ruling related to the intervention concerning the relicensing of Sequoyah Nuclear Plant for an additional 20 years. I am opposed to your ruling and would appreciate having the opportunity to offer comments. Please hold a public comment meeting in the vicinity of Sequoyah or Chattanooga for the local citizens to have input concerning this important issue.

I live downstream of Sequoyah and my drinking water comes from the Tennessee River. I live about 55 miles from Sequoyah, and 40 miles downwind from Brown's Ferry. I am very concerned about the safety and security of all of the TVA nuclear facilities. Serious scrutiny must be given to the relicensing of all of the plants that were designed for a 40 year lifetime and are full of components and systems that were designed for a 40 year use. This is a critical issue for those of us living downwind and downstream. If there is a major accident, we will be lucky to escape unharmed and may lose everything we have and never be able to return.

Please give careful attention.
