SUBJECT: 8/13/13, 1:00PM, CONFERENCE CALL WITH GLOBAL NUCLEAR FUELS-AMERICAS LLC TO DISCUSS SAFETY ANALYSIS REPORT PAGE CHANGES ON THE RAJ-II TRANSPORTATION PACKAGE

Participants:	<u>NRC/NMSS/SFST</u> Michele Sampson Huda Akhavannik	<u>Global Nuclear Fuels-Americas, LLC</u> Scott Murray Phill Ollis Kate Martin Bryce MacDonald Kendall McGowan
---------------	--	---

Global Nuclear Fuels-Americas, LLC (GNF-A) requested a teleconference to discuss upcoming page changes to their original response to second round requests for additional information in a letter dated, June 28, 2013. GNF-A indicated that they could provide these page changes in the end of September time frame. These page changes, which affect multiple sections of the safety analysis report, are a result of new criticality analyses done as part of their responses. These changes would require the addition of a shielding reviewer while the review is already underway. Staff responded that GNF-A should resubmit their application when those page changes are completed and, in the meantime, staff would close the TAC and cease review of the current application.
