Rich,

Sorry it took so long to get back to you. Enrique and I just finished our analysis and thoughts on this effort. Here is what we think.

If this document was a DHS document and it contained Figure 6 on page 14 we would mark it as an FOUO document thus putting handling restrictions on it – not classify it. If Figure 6 was removed we would not place any handling restrictions on it – essentially it would not contain the FOUO markings or any other markings.

We fully understand that since this is the NRC's document you decide whether or not handling restrictions are placed on the document. We will support whichever decision you make.

Please let me know if this meets your needs.

Good morning Craig. Just checking in on your progress on the dam safety report review. I learned yesterday that the Commission plans to issue Orders to NPPs related to flooding (from all sources including dam failures) and so we are being pressed to issue this Generic issue ASAP.

Appreciate your time and support.

Rich

Subject: RE: OUO - GI-204 Dam Safety - ~~OUO~~

Rich,

I met with the folks that led the development of the IP classification guide and to my surprise IP does not have people on staff that routinely review IP-generated documents to ensure the appropriate classification of documents in accordance with our guide. I was referred to a DHS level "classifying group" that IP uses. I sent the POC for that group an email (without your document attached as I did not want to have it in circulation unless I knew for certain they would be helpful) asking for their assistance. They stated that since they are not dams SMEs they could not help us and referred me back to the IP folks that referred me to them in the first place. I am just in awe of the circular tracts here in DHS.

Therefore, I and my dams folks will take the IP guide ourselves and do our own analysis. We will have something to you early next week. I do not think it will change our discussion much if at all.

I apologize for not responding to your earlier email or phone call - I was waiting to hear from the DHS "classifying group."

Have a nice weekend. Mine won't start for another couple of hours. I am going to get dinner here the office and hopefully leave no later than 9pm.

Thanks for your patience and I contact early next week.

Craig,

Just a quick follow up from our call Friday. We're you able to get the screening report on dams to your classifier organization and if so, is there an expected response date? We very much appreciate your time and attention to this matter.

Regards

Rich

Craig,

Yes tomorrow works fine. I spoke with Rebecca and we're scheduled to talk tomorrow at 1:30. I've had a bridge line set up as follows:

Dial-in: 800-369-1871
Confirmation: (b)(6)
Passcode:

b6

Looking forward to the dialogue.

Rich,

I will have Rebecca, my EA set up a call for tomorrow afternoon. The Dams folks will finish their close review by COB today so I recommend a call tomorrow afternoon. Does that work for you?

Thanks,

Craig Conklin

Thx Mike.

Craig. Please call me or have someone call me at 301-251-7430 to set up a time/date to discuss the report contacts and concerns.

Regards

Just got off the phone with Craig Conklin. He and the DHS Dam Security Branch Chief, Enrique Mateo, made a cursory review of the document and indicated there are some items in the report that cause them concern with making it publically available. Craig said they would be able to finish a more thorough review by COB Thursday and have specifically identified items available to discuss.

At this point I'll back out of the coordination role and let you folks contact Craig directly to discuss or set up a telecom. Craig's phone number is 703-603-5168. Let us know if you need any assistance from us as you move forward.
