Subject: RE: SHAW Control No. 580494

The subject document was addressed to Robert Gattone in RIII in follow up to an inspection that Region III performed at PSC, LLC at a Region III location. PSC, LLC is not one of our licensees. The letter enclosed a survey report from SHAW, one of our licensees. However it did not contain any information that needed to be addressed by Region I. We already acknowledged SHAW informing us of their intent to use their NRC license in Region III and of their notification that work was completed. Region III did an inspection of the work in progress. Since we opened it as a notification, SHAW has not received any acknowledgement from us and is not waiting for a letter from Region I.

I spoke to Mr. Gattone today, August 12, 2013, and provided him the ML number for this letter. He said that if we needed to be involved in any way he would call.

I really think we need to void this action.
