**Subject:** Contractor Spill

Ron,

Today we had an incident where a subcontractor of the company that is drilling our Deep Disposal Well discharged approximately 500 gallons of grey water (waste water from the drilling contractors man camp) onto the ground. About 250 gallons of water was vacuumed up with the remaining soaking into the ground.

After being notified about the spill, the WDEQ-WQD was contacted to see if any reporting of the discharge had to be done. The WDEQ-WQD recommended that we go ahead and report the spill. Per their recommendation we are doing so, and as a result, are notifying you of the event.

A written report of the discharge will be sent to you within seven days.

If you have any questions, please give me a call on my cell or send me an email.

Mike
