I don't have it in electronic format. That would take a few hours. Not before Monday.

Can you send your canned slides to them as well as the Doel releasable information?

Can you send me the slides from the Commission briefing? Perhaps this is all the Committee might want to hear. Got an Email in to Dana and Ed on this issue.

Ed,

Would this be for the full committee or materials sub-committee?

chm

Thanks,
Al

Subject: Large NSSS Component Fabrication and Inspection

Mike, Al,

The Members had a discussion at the Sept. Meeting on the recent vessel flaw findings at Doel. This led to an appreciation of the fact that they not had a briefing in this area (Large NSSS Component Fabrication and Inspection) for quite some time (probably not since the last PTS discussion).

Would you guys be able to pull together an information briefing for the October ACRS Meeting (Oct. 4-5) on the latest that is going on in large section steel fabrication and inspection? The Members were particularly interested in the International perspective, since all or most of this fabrication will be taking place outside the U.S.

We will also want to include NRR and NRO on this, but I would like to get your perspectives first.

I realize that this is very short notice – if it helps, this could be viewed as an initial briefing (1 hour) with more to follow in the future.

Thanks,

Ed
