

August 14, 2013

Ms. Sara Forster,
Health Physicist, Licensing Review
U.S. Nuclear Regulatory Commission Region III
Material Licensing Commission
801 Warrenville Road, Suite 210
Lisle, IL 60532

Dear Ms. Forster,

With reference to our discussion related to the amendment request to our license 21-00741-08 to increase the quantity of F-18 and C-11 to 400 mCi and 300 mCi respectively, please find the details below:

1. Applicable NUREG 1556 volume 1 through 11 will be followed to ensure safety regarding shielding criteria and facility survey conformity.
2. In our amendment No. 49 corrected license, please delete the line items N and P as it does not pertain to our current Radiation Safety Program.

Feel free to contact me if any questions.

Thank you,

Sincerely,

A handwritten signature in black ink, appearing to read 'Maha Srinivasan', with a horizontal line underneath.

Maha Srinivasan
Health Physicist & RSO

Dear Ms. Srinivasan:

I have received the attached message and wanted to touch base with you by phone. I am away from my desk, in a training class this week but will try to phone you later this morning (Wednesday, 8/14), sometime between 9 and 10 am, central time, to discuss your response. I apologize for the delay in responding to your message.

Thank you-
Sara Forster

Dear Ms. Forster,

Please find the signed letter requesting for the F-18 maximum activity limit change.

Thanks & Regards,
Maha
