

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION III
2443 WARRENVILLE ROAD, SUITE 210
LISLE, ILLINOIS 60532-4352

AUG 14 2013

Paul Deluise
Vice President, Administrative Services
Community Howard Regional Health, Inc.
3500 S. Lafountain St.
Kokomo, IN 46902

Dear Mr. Deluise:

Enclosed are Amendment Nos. 02 and 45 to your NRC Materials License Nos. 13-32789-01 and 13-13028-02, respectively, in accordance with your request. Please note that the changes made to your licenses are printed in **bold** font.

In your letter dated June 19, 2013, you requested that License No. 13-32789-01 be combined with License No. 13-13028-02, and that the former be terminated as a result. The enclosed Amendment No. 02 is the termination of that license. The enclosed Amendment No. 45 of License No. 13-13028-02 now authorizes the location at 2201 West Boulevard for licensed activities. You confirmed in your letter dated August 7, 2013 that this location will now operate in accordance with the radiation safety program associated with License No. 13-13028-02.

Please review the enclosed documents carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U. S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We

strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Bryan A. Parker
