NUCLEAR REGULATORY COMMISSION
ATOMIC SAFETY AND LICENSING BOARD PANEL
WASHINGTON, D.C. 20555

August 15, 2013

MEMORANDUM TO: Rebecca Giitter, Administrative and Litigation Analyst

FROM: Twana Ellis, Program Analyst

SUBJECT: TENNESSEE VALLEY AUTHORITY
(SEQUOYAH NUCLEAR PLANT, UNITS 1 AND 2)
DOCKET NOS. 50-327-LR, 50-328-LR
ASLBP NO. 13-927-01-LR-BD01
WRITTEN LIMITED APPEARANCE STATEMENT

Dear Ms. Giitter,

The Atomic Safety and Licensing Board handling the above-captioned adjudication recently received the enclosed communication. While it does not constitute evidence, we deem it to be a limited appearance statement filed pursuant to 10 C.F.R. § 2.315(c).

On behalf of the Sequoyah Board, I request that you place the enclosed documents in the electronic hearing docket for this proceeding.

Thank you.

A handwritten signature in cursive script that reads "Twana Ellis".

Dear Judge Karlin,

I find the July 5th ruling to "neither grant nor deny BREDL's request for a hearing and petition to intervene" confusing and disappointing. People who live in the surrounding area of the Sequoya facility request that a hearing be held near the plant site. Requesting a hearing is a right of the citizens of this great democracy, as well as the right to clean water, air, and freedom from pollution and environmental hazards. Please reconsider your decision and act in the best interest of the future children and generations in the Smoky Mountain areas, to make the Tennessee Valley the leader in safe, clean, non-polluting energy.

Thank you for your consideration of this request.

Respectfully

A handwritten signature in black ink, appearing to read "Kathleen Dunnagan", written in a cursive style.

Kate Dunnagan

Judge Karlin,

Concerning Blue Ridge Environmental Defense League's challenge of the 20 year license extension request by the Tennessee Valley Authority for the Sequoyah Nuclear Reactors:

I oppose the July 5th ruling that resulted in no hearing being scheduled.

Please schedule a hearing on the matter near the Sequoyah plant site.

Thank you,

DON SAFER

July 30, 2013

Dear Judge Karlin,

I write to express my disagreement with your ruling of July 5, 2013 in regard to safety issues at Sequoyah nuclear plant in Chattanooga, TN. Your decision ("we neither grant nor deny BREDL's request for a hearing and petition to intervene") is ambiguous. I respectfully request that a hearing be held close to the Sequoyah plant site. This matter is very important. Thank you.

Very truly yours, Robert Stanley

Your Honor,

I just received an updated Study
on Radiation, Leaks and other
Health Problems created.

I am a Hydrogeologist with two
Masters Degrees, also I am well
educated when it pertains to
Radiations and their Effects.

The worst things are is: 1) you
can't see, touch, feel, taste Radiation.

2) Too easy to release Hot Radioactive
Water back into our Rivers, Streams,
Lakes, which eventually ends up
in the Ocean, where we already have
seen the Effects!

- 3) Man-made devices
- 4) too old;
- 5) No Room for Storing Nuclear Waste,
- 6) Yucca Mountain is full and there are no safe places to put it.
- 7) No escape Routes, to get the people out w/ time.
- 8) Radiation is escaping for too long, (70 years) into the air.
- 9) Mixed Plutonium with Uranium can't get separated for re-usage.
- 10) The Fukushima explosion which were built by the same people (2 of them being exact) which build it here on our Eastern Section.
- 11) Companies looking for places only where population are middle class income, Low Income, minorities and poor people are living because it's so much easier to build and dump on them, because the education on this matter is poor. The Eastern Section alone has 98 Nuclear power plants, when anything goes wrong,

which it will we can't use the food, or drinking water in particular

a) Ionizing radiation in a higher dose can cause immediate damage to a person's body, including radiation sickness and death. Lower doses cause cancer, usually it takes a couple of years I can speak for myself, by coming from Germany with a clean Bill of Health, and now I have Cancer. Medical research tells us that this is being going on more than 70 years, how anyone could have permitted something, to make our citizens so sick, slow death, depend how close you live to the plant. That's another thing, why so close?

We have to put under consideration, that there are over 500 Coal Fired Power plants, Chemical and Chemical waste, which gave us over 2000 Superfund clean up sites and which are leaking, but no one cleans them up.

These companies were allowed to walk away from it. The Aquifers are leaking into through the crevices and slowly reaching the people in their drinking water through their Faucets.

The Air we breathe from manmade radiation, not counting Mother Nature, solids definitely suffer too and it's getting worse.

The greatest Cancer risks are iodine-131 and cesium-137

What is wrong with competition to let them come in like Solar, Wind, and Hydro Electric. Because as we all have seen what damage it already has done.

May I remind you that our friend - soil is not the same anymore, the earth moves little by little. I only can say, what we are going to tell our generations and many others that what we did to prevent it

from happening. We get to start to wake up and bring these companies in which are clean and have the best interest at heart. The weather will be getting worse, and breathing out there becomes harder. More people getting sick which is already proven, then the cost not only electricity, but clean washing for five times Taxpayers more to give new Company and existing one to build new plants, and new Units.

Then 3rd: The citizens pay dearly the Hospitals and Doctor for not only their Cancer, but other causes from Radiations like Leukemia, Birth Defects, Lung and other Cancer, disabilities, breathing problems, Asthma, lung diseases, Cardiovascular diseases, Early death from Blood flow to the Brain and many other Problems.

Additional diseases are still being studied by the National Cancer Institute.

Please do not forget Strontium-90, Plutonium-239 and when buried it takes 1000's of years to clear up.

All these and more don't you think it's high time, to stop this.

Please do not hand out so easy permits, the same Companies and others being playing this nasty game since WW II, because the only profiting are the Companies, while our citizen dying a slowly death, some right away when living too close.

The TVA going back many years, and have the blessing from the president, by not being bothered by anyone. Business as usual.

Sir, your Honor, I don't know

how much they told you, by being not so honest and holding back when it comes to releases into the Air and water.

May I also remind you, of what we releasing here in the USA, we allow Radiation to travel by Wind and Water to other Countries, the same other sending it to us we all got to wake up what we are doing to each other.

I am now in the Wheelchair
77 year old, I have COPD,
Thyroid, Breathing, Cancer on the
Uterus, and I am with no
groups - please send me an
answer of what you intend
to do, just please don't give TVA
so easy a permit, this plant
should be closed long time ago -

Sincerely
Ellen Gisela Topolski

P.S. Please consider also what
Terrorism is capable of,

Nuclear Waste on Road big problems,

Earthquake Prone Area,

Faultlines,

Sinkholes

Escape Routes are not enough,
which we don't have

Flooding

Hurricanes

Tornadoes
