PBX Telecommunications System Maintenance

On August 1, 2013, as a result of a non-competitive negotiated acquisition, a firm-fixed-price/labor hour hybrid type contract (NRC-HQ-13-C-31-0047) was awarded to Technology Specialists, Inc., of Bowie, MD, for PBX telecommunications system maintenance. The period of performance is from August 1, 2013, to December 31, 2013, with four 1-year option periods. The total value of the contract is \$555,901, inclusive of all options.

Requirements and Design for the Replacement Reactor Program System

On August 5, 2013, as a result of competitive task order procurement under the multiple award contract for the Maintenance, Operation, and Modernization Support of NRC Application Systems and Environment Functional Area 3, a firm-fixed-price task order (NRC-HQ-13-T-03-0001) was awarded to Solution Technology Systems, Inc., of Arlington, VA. The task order will provide support services to develop comprehensive requirements and design artifacts for the reactor program system replacement and develop an operator licensing tracking system pilot. The period of performance is from August 5, 2013, to January 17, 2014, with no option periods. The total value of the contract is \$2,359,894.

Facility Security Clearance and Safeguarding of National Security Information and Restricted Data; Direct Final Rule; 10 CFR Part 95 (RIN 3150-AJ07; NRC-2011-0268)

On August 7, 2013, the NRC published a direct final rule in the *Federal Register* ([78 FR 48037](#)). The direct final rule updates the NRC's regulations to standardize the frequency of required security education training for employees of NRC licensees possessing security clearances. The frequency of such training will be conducted annually, which is consistent with the objectives of Executive Order 13526, "Classified National Security Information." The rule allows licensees flexibility in determining the means and methods for providing training. This action establishes uniformity in the frequency of licensee security education and training programs and enhances the protection of classified information. A companion proposed rule was published in the same issue of the *Federal Register* ([78 FR 48076](#)). This rule will be effective on October 21, 2013, unless significant adverse comments are received on the companion proposed rule. The comment period for the companion proposed rule closes on September 6, 2013.

Meeting with Institute of Electrical and Electronics Engineers Nuclear Power Engineering Committee

From July 29, to August 1, 2013, staff participated in an Institute of Electrical and Electronics Engineers (IEEE) Nuclear Power Engineering Committee meeting in Mystic, CT. The working group SC-4 is responsible for IEEE standards related to offsite power and onsite alternating current power systems. The working group has updated IEEE 308 "IEEE Standard Criteria for Class 1E Power Systems for Nuclear Power Generating Stations" and issued the latest revision. Subgroup SC-4.3 is updating IEEE 387 "IEEE Standard Criteria for Diesel-Generator Units Applied as Standby Power Supplies for Nuclear Power Generating Stations." The staff provided an update on industry efforts to resolve allowable Technical Specification voltage and frequency bands for emergency diesel generators. Major topics of discussion included proposed plant design improvements to detect single phase events and to improve reliability of offsite power.

Public Meeting on Reactor Oversight Process Commission Paper

On August 5, 2013, the staff held a Category 3 public meeting on the draft Commission paper regarding the approach for risk-informing the reactor oversight process (ROP). The purpose of the meeting was to solicit and discuss external stakeholder feedback on the draft Commission paper regarding the staff's conclusions and recommended approach for risk-informing the ROP for new reactors. The public was invited to participate in the meeting by providing comments and asking questions throughout the meeting.
