

NRC Comments on LAR 13-018 (Module CA-03)
August 29, 2013 Public Meeting

- 1) What corrosion mitigation strategies are in place to address galvanic corrosion concerns?
- 2) How does the licensee plan to address contamination of the duplex stainless steel IRWST plate during fabrication?
- 3) What weld filler material will be used for the dissimilar metal welding, and how is it addressed in the corrosion test plan?
