Re: Question Concerning Storage of Nuclear Density Gauge

Dear Mr. Lodhi,

American Geotech, Inc. wishes to get clarification on storage of nuclear density gauges. We are considering hiring an individual who lives approximately 75 miles from our office, located at 601 Ohio Ave. in Charleston, West Virginia. He would be assigned to projects which are 20 to 40 miles from his home but are 100 to 125 miles from our office. He would be storing the gauge overnight at his home in a storage building at his residence. We would make sure that this storage building would meet the requirements of two independent physical controls to secure the gauge from unauthorized removal while in storage. Another option would be to store the gauge overnight in his vehicle meeting the requirements of two independent physical controls to secure the gauge from unauthorized removal while in storage. The gauge would be brought back to our office during periods of non-use such weekends (when not working) and holidays.

Your response to this matter is appreciated.

Yours Truly,

Joe Francis, RSO
