On July 16, 2013, a Category 2 public meeting was held between the Nuclear Regulatory Commission (NRC) Steering Committee and the Industry Steering Committee for applying the lessons learned from the events at Fukushima Dai-ichi. The meeting was held in the Commissioners' Hearing Room, One White Flint North, 11555 Rockville Pike, Rockville, Maryland. The meeting notice and agenda, dated June 25, 2013, can be found in the Agencywide Documents Access and Management System (ADAMS) under Accession No. ML13171A343. The NRC and industry representatives focused on ongoing Tier 1 and Tier 2 activities including:

- the path forward on the NRC staff's review of licensee integrated plans in response to the Mitigation Strategies Order EA-12-049,
- insights from the NRC staff's recent seismic and flooding walkdown audits,
- the status of the NRC staff's flooding hazard reevaluation (and associated licensee interim actions) reviews,
- the status and path forward regarding the NRC staff's review of the industry's updated seismic ground motion model,
- ongoing NRC staff activities to develop guidance to support licensee compliance with the NRC's Severe Accident Capable Hardened Vents Order EA-13-109 and to develop a regulatory basis for a potential rulemaking related to containment filtration strategies, and

There was substantive discussion and agreement at the meeting, regarding how these areas would be in need of the most NRC and industry senior management attention over the near term. There was also agreement to hold another NRC/industry Steering Committee meeting in August to specifically focus on the progress of the NRC's staff's Mitigation Strategies order integrated plan reviews.

Members of the public were in attendance in the room and via teleconference. Public Meeting Feedback forms were not received.
