Re: NRC Form 7 License application for AP 1000 projects in the People’s Republic of China, Curtiss-Wright reference number U614

Dear Mr. Shaffer:

Curtiss-Wright Flow Control Corporation, operating through its wholly-owned subsidiary, Curtiss-Wright Electro-Mechanical Corporation, (“Curtiss-Wright”) hereby submits an application for license and application fee of \$17,800 for export to the People’s Republic of China (“PRC”) reactor coolant pumps, materials, parts and components and related equipment pursuant to 10CFR part 110, Appendix A (4) and (9).

Please note that we are including 2 copies of the application, a proprietary version that includes the total dollar value of the equipment for export, and a non proprietary version with that value redacted. We respectfully request that only the non proprietary version be made publicly available.

Curtiss-Wright respectfully makes the following special request to the NRC regarding this application. Given the many issues Curtiss-Wright has experienced over the last couple of years related to approval of requests to the US DOE for our Part 810 Authorization and CAEA response times, we ask that we be notified when this request has reached CAEA, and, if possible provide contact information at CAEA. With NRC concurrence, Curtiss-Wright will then have personnel in our office in Beijing reach out to CAEA and the entities named on this license application to facilitate the necessary communications and responses to ensure that this process is completed in a timely way. This would greatly help our efforts to be successful in bidding on the pumps for these projects and meeting the required delivery schedules.

If any additional information is required to process this application, or if there are any questions, please contact the undersigned at 724 275 5145, e-mail rwojszynski@curtisswright.com.

Sincerely,

Raymond R Wojszynski
