Date: Wednesday, September 04, 2013 8:36:00 AM

Good morning Candi,

I had an opportunity to review the shielding plans and calculations for the PET/CT Suite. The only question I had was about the amount of lead shielding that will be put in the walls. On the scanner room diagram there are notes that state "existing, but needs verification". Has that been verified and can you confirm that the inches of shielding specified on the diagram has been installed in the walls surrounding the scanner room? Also, on the uptake room diagram, have you installed the inches of lead per the diagram?

Please respond with a letter signed by senior management confirming the quantity of lead installed in the PET/CT Suite. You may either fax it to me at 610-337-5269 or scan it and send it to me.

Thanks in advance,

Tara L. Weidner
Senior Health Physicist
U.S. Nuclear Regulatory Commission

Subject: MedStar Georgetown Medical Center PET/CT Shielding Design Plan

Good Afternoon Tara,

As discussed on Friday, August 30, 2013, via phone, please find attached the Radiation Shielding Calculations and Plan for PET-CT Facility Upgrade (Scanner Room and Uptake Room). This shielding design plan was performed by Maxwell Amurao on July 27, 2012 and is a scanned version of the copy (without original signature) that is maintained in our office.

Please let me know if you have any questions or need additional information.

Thanks,

Candi

Candi L. McDowell, MHP
