Re: RAM License Amendment

Comments: The Phelps County Regional Medical Center (PCRM) would like to amend the current RAM License, 24-18295-01, to more accurately reflect current staffing and equipment.

The PCRM had been using an outside vendor to supply the HDR equipment utilized in patient treatment, but purchased a unit from the vendor recently. Section 9, Part E should now only include GammMed Plus iX unit. The GammaMed 12it and GammaMed Plus units were utilized previously by the outside vendor, but will no longer be part of the PCRM operations. Additionally, Section 9, Part F can be removed, as the GammaMed 12it is no longer in use and was part of the outside vendor's operations.

The Authorized Users for non-medical uses listed in Section 12, Part C should be updated with the removal of Viswanathan Subbaratnam, David J. Keys, Richard A. Keys, Douglas Boccuzzi, and Jeffrey M Nuskind. Please add Jeffrey S. Wyler to the license in this section. A copy of prior RAM License listing Jeffrey S. Wyler as an Authorized Medical Physicist is attached.

Feel free to contact me for any additional information.
