Subject: RE: Columbia consultation

I called Rich Domingue (NMFS) today and had a short conversation to update him on our progress on providing information for the informal section 7 consultation for Columbia. I told him that we had the answers to all his questions except one that we were working to confirm (the composition of the condenser tubes) and that as soon as we had that information, we'd put the document through concurrence and then send it to NMFS. He had no other questions at this time.

FYI. Rich Domingue left me a voicemail asking about the status of our response to their request for information. I referred him to Dennis Logan.

Rich,

I received your voicemail and forwarded it to Dennis Logan, the NRC aquatic biologist who has the lead for the Columbia ESA/MSA consultation. Please contact Dennis with any questions about this consultation. He can be reached at dennis.logan@nrc.gov or 301-415-0490.

Thanks,
Dan Doyle
