**Subject:** FW: what is the schedule from this point for the Columbia license? EOM

Dennis,

For your reply to Melanie, RPB2 and RERB are done. The FSEIS went to the EPA last Friday, which means that the 30-day cooling off period should end on May 14<sup>th</sup>. After that point, NRC is free to issue the license. We are still in informal consultation with NMFS regarding two endangered species; however, by practice and by precedent, we have not held up license renewals while waiting for informal consultations to conclude.

Bottom line...Columbia's schedule is up to you!

Jeremy
