

This Jeff Norlin I am the electrical foeman at the Federal Prison Camp located in Bryan TX. I recently disposed of two exit signs with the radioactive properties the Isolite exit sign, the two signs that were disposed of properly through a licensed contractor TritiumDisposal.com.

I also have been contact with Angie Hutchinson contractor for the US Nuclear Regulatory Commission in Rockville, MD she informed that there were four exit signs purchased back in 2003, two were disposed of properly, Isolite Model#2040 Serial# a221882 and a221882 however exit signs a221883 and a221885 are still no were to be found and it may be highly likely that they were not disposed of in the proper manner feel free to contact me for any further information.
