Date: Friday, August 23, 2013 10:31:00 AM

Dr. Merton,

I have a few more questions regarding the above listed license renewal. Please submit your response to my attention in a letter. If you have any further questions, please do not hesitate to contact me via telephone or email. I'll be in training next week and will respond to you when I get a chance.

1: You have requested authorization for Drs. Crain, Walden, & Pingoud to use "iodine-131 in quantities less than or equal to 33 millicuries." They are currently only authorized for "iodine-131 for imaging and localization studies." Please clarify and submit additional information if necessary.

2: You have listed dose rates for areas surrounding one of the PET use areas in the range from 2.5 – 7.3 mR/hr. Please justify/further explain your reason for these rates to surrounding areas.

3: In your application, you state that you will utilize a factor of 3 to reduce prostrate patient survey readings. Please justify/further explain the reason for the use of this factor.

4: Do you have a NaI probe available for use during surveys of prostrate implants in the unlikely event a source cannot be located.

Thank you.
