One change I would suggest on Form 540 – Item #11 – the required order of information is now UN ID number, proper shipping name, hazard class, so I would re-order the () listing that way (moving ID # to the front).

78 FR 11907

2/20/2013

①

There will be a change to the certification statement as there is some confusion whether to sign it when the generator is sending waste to a processor. Also, there is an ongoing 10 CFR Part 61 rulemaking project that is proposing changes to the certification. The rulemaking will also propose changes to NRC Form 541 by adding an additional column. I'll send you the draft changes when they become more concrete.

Thanks,
Don

I'd like to be in the loop. I'm not sure how involved we need to be yet though.
Looks like you are considering changes for the "Difficult-to-Measure (DTM) or "Phantom 4" isotopes: C-14, Tc-99, I-129, H-3"
Are other changes anticipated?

Hi Michael,

My name is Don Lowman and I work at the Nuclear Regulatory Commission. I got your email address from Jim Williams and Rick Boyle who I met at the WMG, Inc. RADMAN Users Conference yesterday. I wanted to contact you to let you know we are in the process of updating the Uniform Waste Manifest - NRC Forms 540, 541 and 542. These forms were developed back in the 1990's with the assistance of the DOT so I wanted to make sure the DOT is aware of the project. You can find project details at: <http://www.nrc.gov/waste/llw-disposal/llw-pa/llw-uwm.html>. Please let me know if you feel DOT needs to be involved and to what extent so I can plan DOT's participation. Thanks in advance for your help and please contact me if you have any questions.

Thanks,
