Re: AAR Remediation, Livonia, Michigan

Dear Mr. Smith:

I was requested by Mr. Randy Farneth of Solutient Technologies to send you this letter regarding the AAR soil remediation project in Livonia, Michigan that seeks the approval of the Nuclear Regulatory Commission to dispose of soil generated from that cleanup at the Wayne Disposal landfill located in Van Buren Township, Michigan.

I certify that the following will occur with respect to the above-referenced waste:

1. The material will be disposed with a minimum 10-foot thick cover of other disposal material.
2. The material will be disposed at least 10 feet below the final approved top of waste grade.

If you have questions or additional needs, you may reach me at 734-699-6265 or at kerry.durnen@eqonline.com.

Sincerely,

Kerry Durnen, P.E.
Director of Operations
