Columbus, NC 28722

Dear Ms. Thomas:

On September 19, 2013, you participated in a public meeting held by the U.S. Nuclear Regulatory Commission to review the Integrated Materials Performance Evaluation Program report on the Nevada Agreement State Program. At the end of the meeting, you were provided an opportunity to ask questions or offer comments. One of your comments stated that there were no safe levels of radiation. One of the Management Review Board members, James McNees of the Alabama Radiation Control Program and representing the Organization of Agreement States, spoke up to indicate there have been numerous studies that refute that belief. You were interested to know about these studies. Please find enclosed a number of references for some animal studies that were conducted.

Please feel free to contact me at (301) 415-0694 if you have additional questions.

Sincerely,

/RA/

Lisa Dimmick
IMPEP Manager
