## **NRC Cancels Open House, Meeting on Concrete Degradation at Seabrook Nuclear Power Plant**

Due to the federal government shutdown, the Nuclear Regulatory Commission has cancelled an open house and meeting planned for Wednesday, Oct. 9 in Hampton, N.H., regarding concrete degradation at the Seabrook nuclear power plant. The sessions will be rescheduled once normal government operations resume.

Further information on the status of the open house and meeting will be posted on the NRC [website](#) as it becomes available.

More information about the NRC's reviews of Seabrook concrete degradation can be found on an agency [webpage](#) devoted to that topic.
