Re: Docket ID No. NRC-2012-0246.

The only way to ensure that nuclear waste won't escape and cause mass environmental destruction is to not make it in the first place.

Using existing clean technology, America can produce ALL the energy we need without generating nuclear waste. And, clean energy is cost effective.

We must use the best technology available to safely enclose current nuclear waste. Don't generate more of a problem that we already have.

No one knows what the weather, including seismic activity and violent storms, will be in the future. Nor can we control future generations.  
Remember the half life of plutonium.

Nuclear energy isn't a risk worth taking. America deserves better.

Thank you for your attention.

Sandra Cobb
