RE: Docket No. 40-09092; NRC-2013-0164

Dear NRC Rulemaking & Adjudications Staff,

On behalf of the Campbell County Board of Commissioners, I submit this letter with regard to the License Application Request to construct and operate the Reno Creek ISR Project, submitted by AUC, LLC and our petition to participate as a party under 10 CFR 2.309(h)(1). The AUC, LLC Reno Creek, In Situ Leach Uranium Recovery Project will be located within the borders of Campbell County, Wyoming and we are very interested in the Project moving forward.

Campbell County is home to vast natural resources essential to meeting our nation's energy needs, including significant deposits of coal, oil, natural gas, coal bed methane and uranium. We strongly support the development of uranium extraction within our region. We believe the Reno Creek Project will provide additional clean fuel to address domestic energy demand. This mining operation will offer significant employment opportunities, competitive wages, and provide a solid revenue stream to our County and the State of Wyoming.

As you are aware, the United States is at historic cross roads between energy supply and demand. It is imperative we move prudently, yet decisively, to stabilize this economic quandary, demonstrating sound environmental stewardship and remaining resolute in our quest for energy independence. Therefore, within the boundaries of effective regulatory action and safe practice, we encourage the Nuclear Regulatory Commission to proceed promptly with the issuance of pending license applications and act efficiently to prepare the supplemental Environmental Impact Statement.

Thank you for your time and consideration.

Sincerely,

Dan Coolidge  
Chairman

**Mike, Linda**
