Subject: FOIA Request - American Radium Industries NY
Attachments: Preliminary Assessment Scoresheet.pdf; No further assessment decision.pdf; Pages from Preliminary Site Assessment.pdf

Hello,

I am performing an Environmental Site Assessment on a residential structure in New York City and the property was identified as an EPA federally-regulated CERCLIS NFRAP facility under the name American Radium Industries. The structure was reported to high elevated levels of radiation within the structural components but not enough to warrant inclusion on the National Priorities List. As a result, the site was deferred to the NRC in December of 1992.

I am submitting this FOIA request for any and all records regarding the property identified as American Radium Industries and located at 43 West 16th Street, New York, New York 10011. Information pertaining to investigations performed, contaminants, any mitigation or remediation performed, and conclusions or closure reached. I have attached documentation for the site in order to assist in the search and also confirm the properties deferral to the NRC.

Please inform me of any costs associated with obtaining these documents. If possible electronic copies would be the preferred method of delivery. If you have any questions or need further information please do not hesitate to contact me.

Thank you for your time.
