Subject: Comments regarding written summary of 9/26 meeting in Carlsbad...

October 4th, 2013

Dear Reader,

The correspondence below has only been very slightly cleaned up. At one point I had written "0.01%" but that has been adjusted to a more accurate (I believe) 0.000001%. A few typos have also been corrected. The estimates (a thousand times this, a hundred times that, etc.) are believed to be reasonably accurate. Please bear this in mind while reading my comments. It is probably best to open the list of questions side-by-side.

Regarding my wife's biopsy mentioned in my original cover letter (also shown below), the lymph node tested positive for cancer. That makes five cancer spots, but four have been removed (three in the breast and one lymph node). After a couple of months of chemo, the remaining cancerous lymph node will be treated with radiation, and then she'll get hormone therapy for five to ten years.

The odds are still in her favor for a five year survival, or much longer, but the next few months are going to be rough.

Ace Hoffman
Carlsbad, CA

Oct 4th, 2013

Dear Readers,

Below are my comments on the attached notes. I hope people find them useful. I have not had time to proofread them and feel it is urgent that I get them out before the meeting today.

Question thirteen and related questions are probably the most important ones. Sorry if these comments offend anyone, that is not the intent. The intent is to help us all face the reality of what the real dangers are from our nuclear mistakes here in America.

My wife gets the results of her most recent post-mastectomy biopsy today, in about an hour and a half. I want to thank the NRC staff and others who have wished her well. She had a radiation-guided biopsy on Wednesday, a radiation-guided mastectomy on August 30th, and will almost surely be told she'll be getting radiation and chemo when we meet with the oncologist this morning. It has always been my goal to take a reasonable approach to radiation dangers, and I hope the rest of you will, too.

Thank you,

Ace

>Larry,

>
>I enjoyed our brief visit after the meeting of NRC staff and public representatives in Carlsbad last Thursday morning.

>At the evening session I focused on closely following what was said.

>Attached is my summary of your team's opening presentation based on the hard copy of power point you provided plus my notes of verbal comments made by team members as they presented.

>For the record, none of this text was done by electronic transfer. I entered this entire document on the keyboard.

>
>We would like to post this summary on the Sierra Club website as public
>information, and would appreciate your forwarding the attached draft to
>those who spoke and also to Mary Woolen, with whom I visited on these
>matters at some length. Please feel free to offer any suggestions for
>accuracy or completeness. I made a couple of changes, including moving
>the discussion of economic issues to the end of your opening segment, where it seemed to fit best. Also, as a longtime reporter, I added context in a few cases where a key word appeared by itself on a power point.

Please let me know if this resulted in any misinterpretation. I will prepare a separate document later this week that will summarize questions and answers during the morning and evening discussions.
