Re: NRC Material License # 06-31401-01. Intent to merge practice with Connecticut

Multispecialty Group, PC under NRC Materials License # 06-14854-01.

03008163

This letter serves to notify the agency that we are intending to merge this practice with another, duly licensed NRC facility in the area.

Hartford Heart, LLC, and Connecticut Multispecialty Group, PC will operate as one entity under the Connecticut Multispecialty Group, PC license. We hope to process and make effective the merger on October 1, 2013.

Our two practices perform the same type of nuclear cardiac imaging studies and our staff follow a nearly identical radiation safety program. We have not experienced any failure to oversee the radioactive materials and the controls we have over them. We do not foresee any obstacles in merging our program with the Connecticut Multispecialty Group, PC, program. This merger, as with many other private practice imaging centers that have done so recently, is in response to the many economic and referral pattern pressures that our field is under.

We appreciate your efforts to review our interests and we look forward to a continued safe and effective materials program as part of the Connecticut Multispecialty Group, PC. Thank you.

Respectfully submitted,

Arshad M. Yekta, MD,

President
