Subject: STP - Reference to "Operating License"

John,

In FSAR Subsection 3.9.7.3, penultimate paragraph, it reads:

“As is described for ISI in COL License Information item 6.6.9.1, inservice tests to verify operational readiness of pumps and valves, whose function is required for safety, conducted during the initial 120-month interval must comply with the requirements in the latest edition and addenda of the Code incorporated by reference in 10 CFR 50.55a(b) of this section on the date 12 months before the date of issuance of the **operating license** (or the optional ASME Code cases listed in NRC Regulatory Guide 1.192 that is incorporated by reference in 10 CFR 50.55a(b) of this section), subject to the limitations and modifications listed in 10 CFR 50.55a(b) of this section.”

OGC has objected to the use of the term “operating license” and we have changed our SER to avoid this term. I am suggesting that you should make the same correction in this paragraph because 10CFR50.55a(f)(4)(i) says clearly “...operating license..., or 12 months before the date scheduled for initial fuel load under a combined license under Part 52 ...”

I believe this is the only reference to OL in Chapter 3. But if you find it in other sections, please make the correction.

Regards

Tom Tai
