**Subject:** Protect our communities from radioactive waste!

Sep 22, 2013

Allison McFarlane

Dear McFarlane,

I am writing you because todate, our government seems unable to safely store our most hazardous waste, the radioactive fuel rods from nuclear reactors. We should not license or re-license any reactors period.

I am also concerned that many of our nuclear reactors have over-crowded fuel pools on site. They threaten our communities and industries that surround the plants. The NRC should take immediate action to elimtate these sites.

The sustainability of nuclear power is a big problem. The EIS needs to evaluate the true costs of nuclear power after the subsidies are stripped away as well as the cost of decommissioning them. This who process must be transparent to the public.

Finally, the EIS should consider the environmental footprint of nuclear, mining and long term waste disposal to that of renewables and energy efficiency.

Sincerely,

Jovita Harrah
