EarthLink Revolves Around You.

There are two areas of contention, in the upcoming hearing for the proposed Fermi 3 nuclear power plant. One is building the power plant, would have a major impact, on the already rare Eastern Fox snake. The other is that DTE and its contractor, have not worked hard enough, on analyzing the safety, of the design of the proposed Fermi 3 plant. A number of environmental organizations, believe NRC should not approve, the current design of Fermi 3.
