

MAY 17 1979

DOCKET NOS. 50-361
AND 50-362

APPLICANTS: SOUTHERN CALIFORNIA EDISON COMPANY
SAN DIEGO GAS AND ELECTRIC COMPANY

FACILITY: SAN ONOFRE NUCLEAR GENERATING STATION, UNITS 2 AND 3

SUBJECT: MEETING TO DISCUSS SAN ONOFRE 2/3 OPEN ITEMS

On March 20, 1979, members of the NRC staff met with representatives of the applicants to discuss some of the more substantive unresolved safety issues that have resulted from the staff review of the San Onofre 2 and 3 OL application. Attendees at the meeting are given in the Enclosure. Topics discussed at the meeting are given below.

1. Core Protection Calculator - the applicants indicated their concern that the scope and depth of the staff review of the San Onofre CPC were inappropriate, since the CPC has been reviewed in great detail on the Arkansas Nuclear One, Unit 2 (ANO-2) docket. The staff stated that its review was directed only to those aspects of the San Onofre CPC design that were different from ANO-2. It was agreed that a meeting on the CPC should be held in the near future.
2. Fire Protection - the applicants requested staff clarification of its fire protection criteria for plants located in high seismic activity regions. The staff agreed to set up a meeting on this subject.
3. The applicants requested that the staff clarify its requirements regarding design loads for the fuel element and its spacer grids. The staff indicated that a revised position was being prepared, and would be forwarded to the applicants as soon as a draft was available. The staff noted, however, that final approval of a revised position would take a number of months.
4. The applicants indicated that progress was being made in the areas of Geology, Seismology, and Offsite Hazards, and that amendments in these areas would be forthcoming.
