Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

Enclosed for your review and approval is a proposed change to the San Onofre Nuclear Generating Station Units 2 and 3 Technical Specifications. The proposed change, PCN-238, revises technical specifications 3.0.4, 4.0.3, 4.0.4 and consistently applies exceptions to specification 3.0.4 in twenty-five other technical specifications.

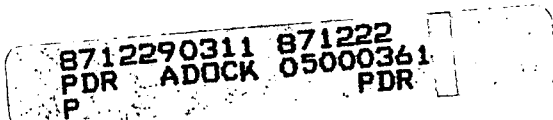

PCN-238 incorporates changes authorized by Generic Letter 87-09. Implementation of these changes will eliminate unnecessary restrictions on mode changes and will reduce the potential for plant shutdowns due to inadvertently missed surveillance tests. The proposed change also eliminates the inconsistent application of exceptions to Specification 3.0.4. Accordingly, the Southern California Edison Company requests timely approval of PCN-238.

In accordance with 10 CFR 170.12, enclosed is the required amendment application fee of \$150. A formal request for PCN-238 will be included in our next formal amendment application.

Should you have any questions regarding this information, please call me.

Very truly yours,

M. O. Medford
