U. S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, D.C. 20555

Subject: Docket Nos. 50-361 and 50-362
Amendment Application Nos. 110 and 94
Changes to Technical Specifications 3.3.3.2, "In-Core Detectors,
Limiting Condition for Operation" and 3/4.8.4, "Electrical
Equipment Protection Devices"
Deletion of the Movable In-Core Detection System
San Onofre Nuclear Generating Station
Units 2 and 3

Gentlemen:

Enclosed are Amendment Application Nos. 110 and 94 to Facility Operating Licenses NPF-10 and NPF-15, respectively, for the San Onofre Nuclear Generating Station (SONGS), Units 2 and 3. These amendment applications consist of Proposed Change Number (PCN) 357. PCN-357 is a request to revise Technical Specifications 3.3.3.2, "In-Core Detectors, Limiting Conditions for Operation," and 3/4.8.4, "Electrical Equipment Protection Devices" (Table 3.8-1, "Containment Penetration Conductor Protective Devices"). Southern California Edison proposes to delete the references to the Movable In-Core Detection System (MICDS) in the Technical Specifications. Changes to the Bases for Technical Specifications 3.3.3.2 and 3/4.8.4 are not required.

The proposed changes have been discussed during telephone conversations with Mr. L. E. Kokajko, NRC Project Manager for SONGS Units 2 and 3, on June 20 and 21, 1991. Mr. Kokajko indicated that NRC approval of PCN-357 would not be required prior to start-up from the Cycle 6 outage.
