Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

References: 1) License Amendment Applications 69 and 55 for San Onofre Units 2 and 3, respectively (Proposed Change Notice (PCN) 275), dated January 8, 1990

2) License Amendment Applications 70 and 56 for San Onofre Units 2 and 3, respectively (PCN-276), dated January 8, 1990

3) License Amendment Applications 72 and 58 for San Onofre Units 2 and 3, respectively (PCN-280), dated January 8, 1990

4) License Amendment Application 74 for San Onofre Unit 3 (PCN-317), dated February 12, 1990

This letter revises the requested approval dates of PCN-275, -276, and -280. Southern California Edison (SCE) had requested that these PCNs be reviewed expeditiously in order to avoid an unnecessary early shutdown of San Onofre Unit 3 (References 1 through 3). Subsequent to that submittal, Unit 3 had an unscheduled trip and was shut down for several days. SCE took advantage of this short unanticipated outage and performed all of the surveillances which expired between April 1, 1990, and the scheduled start of the refueling outage.

The Unit 3 refueling outage has been rescheduled to start April 14, 1990. Accordingly, the need for accelerated review of these License Applications is no longer necessary.

However, it should be noted that our request for expeditious review and approval of PCN-317 (Reference 4) remains valid. This PCN requests a one time extension for the refueling outage interval surveillance for Diesel Generator 3G003 from 24 to 25 months, and as previously requested, requires NRC approval by May 17, 1990.

We recognize that you have expended significant effort with PCN-275, -276, and -280. We appreciate your efforts very much. We believe that our collective efforts thus far will allow these changes to be approved in the near future. Your continued cooperation relative to PCN-317 is greatly appreciated.

If you have any question regarding the changes, please feel free to call me.

Very truly yours,

R M Rosenblum
