Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
Draft License Amendment Prepared under the
Technical Specification Improvement Project
San Onofre Nuclear Generating Station
Units 2 and 3

Enclosed for your information and preliminary review, are draft License Amendments for the Reactivity Control Systems and Power Distribution Limits Chapters prepared under the Technical Specification Improvement Project (TSIP). This submittal is made pursuant to a discussion between Mr. Brian Woods of my staff, and Mr. Jose Calvo (NRC) to permit review by the NRC staff of the San Onofre Units 2 and 3 site specific application of the CE Restructured Standard Technical Specifications (RSTS). This will permit early validation of the CE RSTS, and familiarity with the San Onofre TSIP to be formally submitted later.

This submittal is made, of course, with the understanding that this is only for information at this time and that formal review of the License Amendments within SCE have not been performed and changes are likely.

If you have any comments or questions regarding the attached, please do not hesitate to call.

Very truly yours,

Enclosure
