In the Matter of  
Southern California Edison Company, et al.  
(San Onofre Nuclear Generating Station, Units 2 and 3)  
Docket Nos. 50-361 OL and 50-362 OL

Gentlemen:

At the July 17, 1980 prehearing conference in this proceeding, I informed the Board and parties of the then-current schedule for issuance of the Staff's Safety Evaluation Report (SER), presentation to the ACRS, issuance of the first SER Supplement and issuance of the Final Environmental Statement (FES) (Tr. 186-187).

Since then, the Staff's schedule for the above events has been adjusted. The current estimates are:

Issuance of SER - later 1980/ early 1981

Presentation to ACRS - about 1 month after issuance of SER

First SER supplement - about 6 weeks after ACRS meeting

Issuance of FES - November 1980

With respect to the FES, the Staff is currently preparing a revision to Chapter 7, Environmental Impact of Postulated Accidents, to include consideration of Class 9 accidents in accordance with the Commission's Statement of Interim Policy of June 1980 (45 F.R. 40101). This revision is expected to be published in December 1980 as a draft with opportunity for comment. The Staff will then prepare a supplement to the FES to address comments received on the revised Chapter 7, which it estimates will be issued in late February 1981.

OFFICE

SURNAME

DATE

Also for your information, in September 1980, the Staff's Caseload Forecast Panel visited the San Onofre site to update its projection of completion of San Onofre Units 2 and 3 for fuel loading. It currently estimates that Unit 2 will be ready for fuel loading in the July to September 1981 timeframe.

I will keep the Board and parties advised of any subsequent significant changes in this schedule.

Sincerely,

151  
Lawrence J. Chandler  
Counsel for NRC Staff
