Director, Office of Nuclear Reactor Regulation  
Attention: Mr. Frank Miraglia, Branch Chief  
Licensing Branch No. 3  
U. S. Nuclear Regulatory Commission  
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362  
San Onofre Nuclear Generating Station  
Units 2&3

In accordance with the July 6, 1978 approval of the Preoperational Monitoring Program (PMP) for San Onofre Units 2&3, the results of the PMP have been incorporated into the 1980 Annual Report for San Onofre Nuclear Generating Station. Volume III presents the Marine Environmental Analysis and Interpretations. Copies of Volume III are being sent to both the Office of Inspection and Enforcement, Region V, and the Division of Project Management as required by the Unit 1 Environmental Technical Specifications (ETS) and the approval for the Preoperational Monitoring Program for Units 2&3.

In 1978, the PMP was initiated in compliance with requirements of the Nuclear Regulatory Commission. The PMP along with other environmental monitoring programs provides a baseline of oceanographic and marine biological data prior to the operation of Units 2&3. The Preoperational Monitoring Program is complimentary to the Unit 1 ETS program and essentially expands the study area further offshore into the area of Units 2&3 diffusers. The PMP was started in June, 1978, and terminated in June, 1980, with 24 months of oceanographic and biological studies.

Enclosed are seven copies of Volume III of the 1980 Annual Report for San Onofre Nuclear Generating Station. NRC distribution should be in accordance with distribution Code No. B028. If there are any questions, please contact me.

Very truly yours,

*K.P. Baskin*
