Attention: Mr. George W. Knighton, Branch Chief
Licensing Branch No. 3
U. S. Nuclear Regulatory Commission
Washington, D.C. 20555

Gentlemen:

Subject: Docket Nos. 50-361 and 50-362
San Onofre Nuclear Generating Station
Units 2 and 3

Reference: April 27, 1984 letter from Kenneth P. Baskin (SCE) to
H. R. Denton (NRC), Subject: same as above

The purpose of this letter is to request that revisions be made to two proposed technical specification changes for the San Onofre Nuclear Generating Station, Units 2 and 3 which were submitted to the NRC from the Southern California Edison Company (SCE) by the above reference, but have not yet been approved. These editorial revisions are necessary to correct containment tendon end cap designations.

The changes affected by this request are Proposed Changes NPF-10/15-114 which were requests to revise Technical Specification 4.6.1.6, Containment Tendons. These proposed changes are to clarify the containment tendon surveillance requirements to be consistent with the current surveillance program and to reduce surveillance requirements based on anchorage accessibility.

By this letter, SCE requests that one editorial revision be made to Table 4.6-1 "Tendon Surveillance" within Technical Specification 4.6.1.6 of each license. The hoop U tendons are listed in Table 4.6-1 using a two number designation to indicate the tendon end cap numbers for that tendon. The enclosed Tables 4.6-1 correct one (1) improper designation in the 30 year column in the Unit 2 table and one (1) improper designation in the 3 year

column in the Unit 3 table. To facilitate your processing of this request, the previously proposed changes NPF-10/15-114 are enclosed with the corrected Tables 4.6-1 added.

If you have any questions regarding the information provided by this letter, please call me.

Very truly yours,

M.D. Medford
